I in possiliar taint or injection which we call Schoreta lurks. Its the constitutions of multitudes of nich. It produced by an enfeelded, vitiated state of the blood, wherein hat fluid becomes inmpetent to sustain in vital forces in their igorous action, and

leaves the system to - fall into disorder and decay. The scrofulous contamination is variously caused by mercurial disease, low disordered digestion from unhealthy food, impure air, fifth and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it scoms to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children." The diseases it originates take various names, according to the organs it attacks. In the lungs, Scrofula produces tubercles, and finally Consumption; in the glands, swellings which supparate and be-come ulcerous sores; in the stomach and bowels, derangements which produce indigestion, dyspepsia, and liver complaints; on he skin, eruptive and cutaneous affections. These, all having the same origin, require the same remedy, viz., parification and invigora-tion of the blood. Purify the blood, and

known by all who have given it a trial. That it does combine virtues truly extraordinary in their effect upon this class of complaints, is indisputably proven by the great multitude of publicly known and remarkable cures it has made of the following diseases: King's Evil, or Glandular Swellings, Tumors, Eruptions, Pimples, Blotches and Sores, Erysipelas, Rose or St. Anthony's Fire, Salt Rheum, Scald Head, Coughs from tuberculous deposits in the lungs, White Swellings, Debility, Dropsy, Neuralgia, Dyspepsia or Indigestion, Syphilis and Syphilitic Infections, Mercurial Diseases, Female Weaknesses, and, indeed, the whole series of complaints that arise from impurity of the blood. Minute reports of individual cases may be found in AYER'S AMERICAN ALMANAC, which is furnished to the druggists for gratuitous distribution, wherein may be learned the directions for its use, and some of the remarkable cures which it has made when all other remedies had failed to afford relief. Those cases are purposely taken from all sections of the country, in order that every reader may have access to some one who can speak to him of its benefits from

personal experience. Scrofula depresses the vital energies, and thus leaves its victims far more subject to disease and its fatal results than are healthy constitutions. Hence it tends to shorten, and does greatly shorten, the average duration of human life. The vast importance of these considerations has led us to spend years in perfecting a remedy which is adequate to its cure. This we now offer to the public under the name of Aven's Sarsaparilla, sithough it is composed of ingredients, some of which exceed the best of Sarsaparilla in alterative power. By its aid you may protect yourself from the suffering and danger of these disorders. Purge out the foul corruptions that rot and fester in the blood, purge out the causes of disease, and vigorous health will follow. By its pecuhar virtues this remedy stimulates the vital functions, and thus expels the distempera-

which lurk within the system or burst out on any part of it. We know the public have been deceived by many compounds of Sorsaparilla, that promised much and did nothing; but they will neither be deceived nor disappointed in this. Its virtues have been proven by abundant trial, and there remains no question of its surpassing excellence for the cure of the afflicting diseases it is intended to reach. Although under the same name, it is a very different medicine from any other which has been before the people, and is far more effectual than any other which has ever been

The world wide renown these Melodeons have obtained within the last few years is a sure evidence of their superiority over all others. We are now manufacturing some thirty different kinds of these Instruments, and have recently added to our former large variety, the COTTACE ORGAN, with or without the Harmonic Attachment and Manual Sub-Bass. This Instrument has no equal of its size for power and efficiency and is really the most desirable for Sabhath Schools, Churches, Lecture Rooms, Vestries, Public Halls, &c., that can be obtained as the low price at which it is sold brings & within the means of the most limited, and supplies a place which it thas long been felt no instrument was peculiarly adapted. Its size, compactness, power and beauty of lone, nextness and simplicity of construction and case of management will at once recommend it to overy one as being all that is claimed for it.
